

Verilon FR Clean Vinyl Care & Cleaning

Because it is pliable, vinyl can easily be scratched and caution needs to be exercised when working with the material.

When cutting, sewing, or sealing, make certain that all surfaces are clean and smooth.

Clear vinyl should be cleaned regularly to remove dirt. Abrasive cleaners cannot be used on window vinyl. Cleaning should be done with a mild vinyl cleaner or basic mild neutral soap such as Ivory or Lux mixed with lukewarm water. Rinse thoroughly with water. **Do Not Use Detergents.**

Vinyl windows and curtains should not be folded and stored an extended period of time when damp or wet.
